

Abdur Rahman

Senior Mobile Architect | Full-Stack Engineering Lead | Flutter & React Native Systems

fuhad1987@gmail.com +88 01687671007 Remote / Bangladesh github.com/arfuhad
linkedin.com/in/abdur-rahman-fuhad

PROFESSIONAL SUMMARY

Senior mobile architect and full-stack engineering lead with 6+ years delivering production iOS, Android, backend, and dashboard systems for remote international teams. Led developers, shaped scalable architecture, improved release speed by 40%, reduced duplicated code by 30%, and shipped products across travel, parking, social, and WebRTC.

CORE SKILLS

Mobile Development: Flutter, Dart, React Native, iOS, Android, Bloc, Provider, GetX, app flavors

Backend Development: Node.js, NestJS, TypeORM, BullMQ, .NET Core, Django, Go, REST APIs, GraphQL, WebRTC, Socket.io

Cloud & Firebase: Firebase Auth, Analytics, Crashlytics, Remote Config, Cloud Messaging, App Distribution, AWS S3

Databases: PostgreSQL, PostGIS, MySQL, SQL Server, Redis

DevOps & CI/CD: Docker, PM2, GitHub, CI/CD pipelines, automated releases, environment management

Architecture & Leadership: mobile architecture, code review, mentoring, Agile delivery, technical planning

PROFESSIONAL EXPERIENCE

Team Lead, Full-Stack Mobile Engineering

September 2023 - Present

Potential Inc. | Remote

- Lead full-stack delivery for mobile apps, NestJS backends, and React dashboards across consumer and internal products.
- Built Blink end to end: React Native/Expo app, React Router admin dashboard, NestJS API, PostgreSQL/PostGIS, Redis, BullMQ, Socket.io, and WebRTC/TURN infrastructure.
- Delivered Blink features across auth, matchmaking, blink detection, chat, wallets, gifts, notifications, moderation, content management, health checks, and background jobs.
- Created reusable Flutter packages and shared patterns, reducing duplicated implementation by 30%.
- Built CI/CD and release automation, cutting release cycle time by 40% for App Store and Google Play deployments.
- Set architecture standards for state management, app flavors, Firebase observability, and performance.
- Run code reviews, sprint planning, mentoring, and risk reviews across Flutter, React Native, and WebRTC.

Flutter Developer

October 2021 - August 2023

Saimon Global Ltd. | Hybrid

- Delivered Tryotel, a leading Bangladesh OTA app for flight search, booking, payments, and live travel data.
- Implemented GraphQL, Bloc, Firebase Auth, Remote Config, Analytics, and Crashlytics for reliability and observability.
- Introduced app flavors and cleaner release workflows across development, staging, and production builds.
- Worked with product, QA, backend, and business teams under changing partner requirements.

Software Engineer

November 2020 - September 2021

Edusoft Consultants Ltd. | Hybrid

- Built university and school platforms across Flutter mobile, .NET Core APIs, and SQL Server databases.
- Used Provider and GetX to standardize state management across multiple academic applications.

Full-Stack Developer, Freelance

December 2019 - October 2020

Remote

- Delivered client websites, APIs, and Flutter apps using .NET Core, Django, SQL, and cross-platform tooling.

FLAGSHIP PROJECTS

Blink - Full-Stack Real-Time Social Gaming Platform, Potential Inc.

Built the backend, dashboard, and app for a WebRTC blink-detection game with matchmaking, chat, social profiles, wallet/economy, gifts, reports, FCM notifications, content management, admin operations, and queue-based background processing.

Technologies: React Native, Expo, React Router, NestJS, PostgreSQL/PostGIS, Redis, BullMQ, Socket.io, WebRTC, Firebase, Docker

Park Park (파크) - Korean Smart Parking Marketplace, Potential Inc. iOS | Android

Led Flutter delivery for a mobility/payment marketplace with Naver Maps, shared parking facilities, car-number payment flows, Toss/BrandPay billing, saved cards, rewards/refunds, FCM notifications, deep links, and background navigation services.

Technologies: Flutter, Dart, Bloc/Cubit, GetIt, Naver Map, Toss Payments/BrandPay, Firebase, FCM, Socket.io, GoRouter, Deep Links, Shorebird

Tryotel - OTA Travel Booking App, Saimon Global Ltd. iOS | Android

Built flight search, booking, payment, and travel-data workflows with Bloc architecture, Firebase observability, GraphQL, and release flavors.

Technologies: Flutter, Dart, GraphQL, Firebase Analytics, Crashlytics, payment gateway integration

Tomo - Location-Based Community App, Potential Inc. iOS | Android

Delivered a Korea and Japan social platform connecting users by residential area, with social login, Firebase telemetry, and REST APIs.

Technologies: Flutter, Firebase, REST APIs, LINE login, Apple login, Google login, Crashlytics

React Native WebRTC Face Detection - Open Source npm Package

Created an ML Kit package adding face detection, blink counting, head pose estimation, hooks, and liveness checks to WebRTC workflows.

Technologies: React Native, TypeScript, WebRTC, Google ML Kit, face detection, liveness checks

EDUCATION

BSc in Computer Science & Engineering

United International University | 2014 - 2019

SELECTED ACHIEVEMENTS

- Best Paper Award, IEMIS 2018: Wavelet and Pyramid Histogram Features for Leaf Detection.
- Published Flutter Basic Essentials on Pub.dev for networking, UI error handling, and utilities.

Open to remote-first European teams, relocation opportunities, and EU Blue Card sponsorship.
